## HOW TO UPGRADE FIRMWARE ON THE WOLVERINE FLASHPRO

Upgrading firmware on the FlashPro is very easy. Just follow the few steps below:

1. After downloading the new firmware from the Wolverine website unzip or extract the folder
2. Connect the FlashPro to your computer and copy the firmware file G3914114.G39 to the FlashPro hard drive
3. Disconnect the FlashPro from the computer
4. Turn on the FlashPro, locate firmware file and press <OK> to install
5. Follow on screen instructions- **DO NOT SHUT OFF THE UNIT WHILE INSTALLING FIRMWARE**
6. After firmware update is complete press the Reset hold (located on the unit's right side) with a paper clip
7. New firmware version will display for few seconds at the FlashPro startup screen
