

Wolverine F2D Mighty

How to adjust zooming to eliminate default cropping

The default settings for the Wolverine F2D Mighty is to Horizontally crop the image slightly because of the 4:3 digital aspect ratio. If you would like to eliminate cropping but don't mind having black bands on top and bottom of the image do the following:

- 1) Power the unit
- 2) At the Film Type prompt press and HOLD the right arrow button, while holding the right arrow button tap the OK button.
- 3) At the Setup Options screen press the HOLD the left arrow button, while holding the left arrow button tap the OK button.
- 4) Press the Right Arrow button twice to highlight "WinRange" and press OK/ENTER.
- 5) Press the Right Arrow button to Zoom-Out or the Left Arrow Button to Zoom-In. You can set the image size up to 98%.
- 6) Press OK/ENTER button to finalize setting.
- 7) Press C button to Exit setup option.
