

## **HOW TO INSTALL FIRMWARE UPDATE FOR THE WOLVERINE SATURN**

1. Copy the file FS210.bin and FACTORY.CFG to the Root Directory of the SD card.
2. Insert the SD card into the Wolverine.
3. Power the unit and the Firmware will instantly load.
4. When you see the Main Menu turn off the Wolverine.
5. In order not to keep reloading the firmware every time you turn on the machine, take the card out of the Wolverine and delete the Firmware file or Format the memory card using the Wolverine "Delete All" option to wipe the card clean. PS: Formatting will also delete all images on the SD card.
